
SGT115 : Surgical Case Management

Students will learn the steps of surgical case management to include preoperative, intraoperative, and postoperative patient care, creation and maintenance of the sterile field, patient positioning, draping procedures, and surgical procedure progression. Lab instruction will be included to apply theory to practice. The knowledge gained during this course will provide the students with the necessary skills needed to progress to the next level of training.

Credits	4
Clock Hours	60
Lab Hours	40
Lecture Hours	20
Prerequisites	SGT101 , SGT105
