
SGT210 : Simulation: Diagnostic, Endoscopy, General, Genitourinary, Obstetric and Gynecological Procedures

This course places the student into a laboratory environment in which students will develop and reinforce the practices and principles of the surgical technologist in a simulated operating room environment. Students will be participating in a variety of simulated surgical procedures including diagnostic, endoscopic, general, genitourinary, and obstetric and gynecological surgery designed to simulate an actual working operating room complete with equipment, instrumentation and simulated patients. The students will learn and perform the different roles of the sterile and non- sterile team members with a large concentration focused on the STSR position.

Credits	4
Clock Hours	60
Lab Hours	40
Lecture Hours	20
Prerequisites	SGT115
