
SGT225 : St Capstone and Certification Review

This course is a review of the core surgical technology curriculum. The lecture and activities are designed to reinforce and review the program content from inception to completion with a focus on student performance, comprehension and group information sessions. The students will sit for and be required to pass a practice certification exam as a precursor to the NBSTSA Certification Exam. A practice certification exam is the final exam for the course.

Credits	4
