
DHG223 : Community Oral Health

This course introduces the history and principles of community dental health and health care delivery systems. Topics include the prevention of oral disease, development of public policy, and implementation of community efforts to enlighten the public. Issues surrounding access to care, managed care, private practice, independent practice, as well as trends in dental insurance reimbursement are presented. In addition, students will gain insight into research design and statistical methods and evaluation by participating in a table clinic or poster research project. Selected current topics in international healthcare are presented. The student will participate in a community-based program from the planning stage through to evaluation.
