
RAD103 : Introduction to Radiography

Content provides an overview of the foundations of radiography and the practitioner’s role in the health care delivery system. Principles, practices, and policies of health care organizations are examined and discussed in addition to the professional responsibilities of the radiographer. Content also presents an overview of the principles of radiation protection and provides a foundation in ethics and law related to the practice of medical imaging. An introduction to terminology, concepts, and principles will be presented. Students will examine a variety of ethical and legal issues found in clinical practice.
