NUR209 : Medical-Surgical Nursing II

This course focuses on the role of the nurse in promoting, maintaining, and restoring health for adults experiencing endocrine, gastrointestinal, neurological, musculoskeletal, genitourinary, and life-threatening problems. Emphasis is placed on the decision-making process required for complex clinical situations. The course fosters the integration of concepts and skills presented in Previous courses. Clinical learning experiences allow the student to apply leadership and management principles to the care of individuals, families, and groups.
