# 871 : Sanitation

Students apply skills in infection control, properties of the hair and scalp and basic skin care learned in theory to anatomical models and clients on the clinic floor. Students will practice sterilization and sanitation techniques while applying safety principles designed for the client and salon. Students study the history and opportunities of cosmetology, personal management and communication skills, the professional image, the principle and practices of infection control, properties of the hair and scalp, and histology of the skin. Students learn First Aid and prevention of HIV/AIDS.
