BT101 : Standard Lab Operating Procedures I

The focus of this course is on mastery of basic standard laboratory operating procedures. Record-keeping, safe and proper use of equipment, scientific methodologies, and employee etiquette are stressed. Students learn sterile technique, volume and mass measurement, solution and dilution preparation. Continued emphasis is placed on students utilizing their developed skills to learn advanced lab operating procedures including sterile techniques, solution preparation, dilutions, mass calculations, etc.

Credits	3
Clock Hours	80
Lab Hours	60
Lecture Hours	20
Prerequisites	None
